## NetSol Low Power SRAM Available from ARCO

Montvale, NJ – February 15, 2016: NetSol’s new family of Low Power SRAM are now available from ARCO, INC. meeting the demand of industrial customers for access to SRAM technology for new designs, and long term support for legacy products with the quality necessary to maintain products at optimal performance.

NETSOL has been supporting Network and Industrial customers with Asynchronous Fast SRAM, Synchronous SRAM and Quadruple DDR SRAM memory products under a Patent License Agreement with Samsung Electronics since 2012, resulting in long term product support of Samsung SRAM in terms of Process Technology, Design Technique, Assembly and Test.

“Adding Low Power SRAM establishes NETSOL as a total SRAM solution manufacturer and strengthens ARCOTEK’s commitment to offer our customers a comprehensive portfolio of memory solutions to meet our customer’s demand for long term support for new and legacy product designs.” said Rick Kapoor, Director of Memory Product Marketing.

### Evaluation Sample Availability:

1Mb and 2Mb Low Power SRAM    February, 2016

4Mb and 8Mb Low Power SRAM    April, 2016

### About NETSOL

NetSol Co., Ltd., an acronym for Network Solution, is a fabless memory design house headquartered in Korea, founded on the need for a supplier to provide long term support of legacy products and special featured niche memories. NetSol is committed to be your non-commodity memory supplier whose presence will contribute to stable supply chain management.

### About ARCO, INC

ARCO, INC., a member of the ARCOTEK group, a global collaborative organization that has specialized in providing memory solutions since 1994. We provide memory solutions ranging from state of the art technologies for new designs-ins to legacy products for designs requiring long-term product support.

Your relationship with ARCOTEK starts with your needs and not our line card.
